## The next time you see litter think about this:

### Years to decompose:

**Cigarette Butt:** 10-50 years; **Plastic Bag:** 10-20 years; **Plastic Soda Bottle:** 450 years; **Aluminum Can:** 200-500 years; **Monofilament Fishing Line:** 600 years; **Styrofoam:** never.

Cigarette butts are the #1 littered item. This is not a smoking issue -- it's an environmental issue. The plastic filters end up polluting our water supply when they release toxic chemicals. Birds, fish and turtles eat litter thinking it's food and die because they can't digest the man-made substances.

**THANK YOU** for preventing litter and preserving the planet for future generations.

## THANK YOU

for pitching in to help create a litter-free environment. Together we can change the way we all think about litter.

← CUT

## IMPORTANT

Intention & attitude in handing out these cards is crucial. If the litterer feels we are making them 'wrong' they will not get the message. It only works if you can do it with humor and kindness. Use your own judgement about when it's safe to hand these out.

----- ← CUT

Buckminster Fuller said: "You never change things by fighting the existing reality. To change something, build a new model that makes the existing model obsolete."

----- ← CUT -----

## PRINTING:

Print on card stock, if available. It will produce the best results. If you use inkjet ink, you might want to laminate the cards so they don't smear.

----- ← CUT -----

The Museum of Litter has two-sided laminated cards available for purchase in its giftshop.
